

# Targeted consultation on the establishment of an EU Green Bond Standard

Fields marked with \* are mandatory.

## Introduction

---

This consultation is also available in [German](#) and [French](#).

Diese Konsultation ist auch auf [Englisch](#) und [Französisch](#) verfügbar.

Cette consultation est également disponible en [allemand](#) et en [anglais](#).

In March 2018, the European Commission published its Action Plan on Financing Sustainable Growth with the goal of embedding sustainability considerations at the heart of the financial sector. Specifically, it aims to:

1. reorient capital flows towards sustainable investment to achieve more sustainable and inclusive growth;
2. manage financial risks stemming from climate change, resource depletion, environmental degradation and social issues; and
3. foster greater transparency and long-termism in financial and economic activity.

As part of the Action Plan, the Commission committed to developing standards and labels for green financial products and instruments, including an EU Green Bond Standard (EU GBS).

As a first step, the Commission's Technical Expert Group on sustainable finance (TEG) was tasked with preparing a report on an EU GBS.

The TEG published its first report in June 2019 with 10 recommendations for the establishment of an EU GBS based on current best market practices and feedback received from stakeholders. The TEG also recommended the creation of an official voluntary EU GBS building on the new EU Taxonomy, which provides a classification system for sustainable economic activities. The TEG provided further usability guidance in March 2020, which includes an updated proposed standard (see the annexes).

The Commission is now considering how to take the recommendations of the TEG forward, including in a possible legislative manner. This consultation is designed to gather further input of a technical nature from relevant stakeholders in the green bond market, in particular issuers, investors and related service providers.

The questions assume that the reader has read the reports by the TEG on the EU GBS and is familiar with the proposed content of the EU GBS, including its link to the EU Taxonomy. If this is not the case, the [report on the EU GBS](#), the [TEG usability guide on the EU GBS](#) and the [final report on the EU Taxonomy](#) should be read first. A brief summary of the EU GBS as proposed by the TEG is provided at the beginning of the consultation.

## The European Green Deal

This consultation builds upon the [European Green Deal](#), which significantly increases the EU's climate action and environmental policy ambitions. To complement the Green Deal, the Commission also presented the [European Green Deal Investment Plan](#), which seeks to mobilise at least €1 trillion in sustainable investments over the next decade. As part of the Green Deal and its investment plan, the Commission reaffirmed its commitment to establish an EU GBS. The Commission also committed to developing a [renewed sustainable finance strategy, which is the subject of a separate public consultation](#) currently open for submissions until 15 July 2020. That consultation contains several questions on green bonds and respondents are requested to also participate in it.

## COVID19 & Social Bonds

Social bonds have emerged as a key instrument for mobilising private capital for social objectives. Social bonds are similar to green bonds, except that the proceeds are used exclusively for social causes, instead of energy transition and environmental goals.

The ongoing COVID-19 outbreak shows the critical need to strengthen the sustainability and resilience of our societies and the importance of integrating social issues and objectives into the broader functioning of our economies. Financial markets have so far responded to the challenge with increased issuance of social bonds responding to the impact of COVID-19.

These social bonds often follow established market-based Social Bond Principles. The Commission is seeking the input of stakeholders on the lessons learned from this new development, including whether the Commission can play an even greater supportive role in building resilience to address future potential crises.

---

**Please note:** In order to ensure a fair and transparent consultation process **only responses received through our online questionnaire will be taken into account** and included in the report summarising the responses. Should you have a problem completing this questionnaire or if you require particular assistance, please contact [fisma-eu-green-bond-standard@ec.europa.eu](mailto:fisma-eu-green-bond-standard@ec.europa.eu).

## I. Questions on the EU Green Bond Standard

---

### About the TEG proposed EU GBS

The EU GBS aims to address several barriers identified in the current market. Firstly, by reducing uncertainty about what constitutes green investment by linking it to the EU Taxonomy. Secondly, by standardising costly and complex verification and reporting processes, and thirdly, by establishing an official standard to which potential incentives could be linked.

The EU GBS as proposed by the TEG is intended to finance both physical and financial assets and includes the use of the latter as security (i.e. as a covered bonds or asset-backed securities).

The key components of such a standard – as recommended by the TEG and building on best market practices such as the Green Bond Principles and the Climate Bonds Initiative labelling scheme – should be:

1. alignment of the use of the proceeds from the bond with the EU Taxonomy;
2. the publication of a Green Bond Framework;
3. mandatory reporting on the use of proceeds (allocation reports) and on environmental impact (impact report);  
and
4. verification of compliance with the Green Bond Framework and the final allocation report by an external registered/authorised verifier.

### Questions on the potential need for an official / formalised EU GBS

**Question 1. In your view, which of the problems mentioned below is negatively affecting the EU green bond market today? How important are they?**

	1 (no impact at all)	2 (almost no impact)	3 (some impact)	4 (strong impact)	5 (very strong impact)	Don't know - No opinion - Not applicable
Absence of economic benefits associated with the issuance of green bonds	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
Lack of available green projects and assets	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Uncertainty regarding green definitions	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
Complexity of external review procedures	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
Cost of the external review procedure(s)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
Costly and burdensome reporting processes	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Uncertainty with regards to the eligibility of certain types of assets (physical and financial) and expenditure (capital and operating expenditure)	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Lack of clarity concerning the practice for the tracking of proceeds	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Lack of transparency and comparability in the market for green bonds	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
Doubts about the green quality of green bonds and risk of green washing	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>

Other	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
-------	-----------------------	-----------------------	-----------------------	-----------------------	-----------------------	-----------------------	-----------------------

**Question 2. To what extent do you agree that an EU GBS as proposed by the TEG would address the problems and barriers mentioned above in question 1?**

	1 (very negative impact)	2 (rather negative impact)	3 (no impact)	4 (rather positive impact)	5 (very positive impact)	Don't know - No opinion - Not applicable
Absence of economic benefits associated with the issuance of green bonds	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Lack of available green projects and assets	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
Uncertainty regarding green definitions	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
Complexity of external review procedures	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
Cost of the external review procedure(s)	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Costly and burdensome reporting processes	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Uncertainty with regards to the eligibility of certain types of assets (physical and financial) and expenditure (capital and operating expenditure)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
Lack of clarity concerning the practice for the tracking of proceeds	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>

Doubts about the green quality of green bonds and risk of green washing	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>

Other	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
-------	-----------------------	-----------------------	-----------------------	-----------------------	-----------------------	-----------------------

**Question 3. To what extent do you agree with the proposed core components of the EU GBS as recommended by the TEG?**

	1 (strongly disagree)	2 (rather disagree)	3 (neutral)	4 (rather agree)	5 (strongly agree)	Don't know - No opinion - Not applicable
Alignment of eligible green projects with the EU Taxonomy	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
Requirement to publish a Green Bond Framework before issuance	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Requirement to publish an annual allocation report	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
Requirement to publish an environmental impact report at least once before final allocation	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
Requirement to have the (final) allocation report and the Green Bond framework verified	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>

### Question 3.1 Please specify the reasons for your answer to question 3:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

We welcome the recommendation of the TEG to introduce a voluntary EU GBS that seeks to overcome some of the drawbacks and barriers that have stunted the development and evolution of the green bond market so far. We agree with the proposal of the TEG to align with the Taxonomy, but urge the adoption of a flexible approach that also allows for issuance of green bonds linked to other existing standards such as for example the ICMA green bond principles. At the same time, we would recommend that an EU GBS would allow for general corporate purpose issuance. If green bond issuance is strictly limited to individual projects (even if multiple projects can be grouped under a green bond framework) the market is unlikely to increase significantly in size. Allowing for general corporate purpose issuance would provide a significant boost to the green bond market and accelerate the shift towards more sustainable investments. One way to enable the development of a general corporate purpose green bond market would be to leverage the disclosure that non-financial companies will already be required to make under both the Taxonomy Regulation (disclosure of CapEx, OpEx and turnover derived from compliant activities) and commensurate requirements under the NFRD (and its review). Companies meeting a minimum threshold on the above indicators could then qualify for issuing general corporate purpose bonds that could be classified as EU Green Bond Standard compliant.

### Question 4. Do you agree with the proposed content of the following documents as recommended by the TEG ?

*Please note that these reporting requirements refer only to the requirements in relation to the issued green bond (it is common in the green bond market to have reporting on the bond). These reporting requirements are not related to disclosure requirements for companies or funds, which arise from the EU Taxonomy Regulation or the Sustainability –related Disclosures Regulation.*

#### a) The Green Bond Framework:

- Yes, I do agree with the proposed content of the Green Bond Framework
- No, I disagree with the proposed content of the Green Bond Framework
- Don't know / no opinion / not relevant

#### b) The Green Bond Allocation Report:

- Yes, I do agree with the proposed content of the Green Bond Allocation Report
- No, I disagree with the proposed content of the Green Bond Allocation Report
- Don't know / no opinion / not relevant

#### c) The Green Bond Impact Report:

- Yes, I do agree with the proposed content of the Green Bond Impact Report
- No, I disagree with the proposed content of the Green Bond Impact Report

- Don't know / no opinion / not relevant

**Question 5. Do you expect that the requirement to have the Green Bond Framework and the Final Allocation report verified (instead of alternatives such as a second-party opinion) will create a disproportionate market barrier for third party opinion providers that currently assess the alignment of EU green bonds with current market standards or other evaluation criteria?**

- Yes
- No
- Don't know / no opinion / not relevant

### Questions on the use of proceeds and the link to the EU Taxonomy

The [EU Taxonomy Regulation](#) specifies that the Union shall apply the EU Taxonomy when setting out the requirements for the marketing of corporate bonds that are categorised as environmentally sustainable. Given that the EU Green Bonds initiative will pursue, as its core objective, the aim of delineating the boundaries of what shall constitute an 'environmentally sustainable' bond, the Taxonomy will need to be applied to determine the eligibility of the proceeds of the bond issuance. However, there may be reasons to provide a degree of flexibility with regard to its application, or its application in specific cases.

Building on market practice, the proposed EU GBS by the TEG recommends a use-of- proceeds approach, where 100% of the proceeds of an EU Green Bond should be aligned with the EU Taxonomy (with some limited flexibility).

The below questions aim to gather stakeholder input on the application of the taxonomy in the context of EU Green Bonds.

**Question 6. Do you agree that 100% of the use of proceeds of green bonds should be used to finance or refinance physical or financial assets or green expenditures that are green as defined by the Taxonomy?**

- Yes, with no flexibility
- Yes, but with some flexibility (i.e. <100% alignment)
- No
- Don't know / no opinion / not relevant

**Question 6.1 Please specify the reasons for your answer to question 6:**

*5000 character(s) maximum*

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

We welcome the linkage between use of proceeds and the EU Taxonomy, but would encourage a flexible approach that allows for less than 100% alignment with the Taxonomy. Allowing for flexibility in this regard would support corporates in achieving customised sustainability goals at financing costs that are comparable to non-sustainability-linked debt markets. Equally allowing for flexible alignment with the EU taxonomy could reduce the risk of having green bonds that were deemed in alignment with the EU taxonomy at issuance become disaligned by the time of full allocation due to the ongoing evolution of the Taxonomy.

## Question 7.

The TEG proposes that in cases where

1. the technical screening criteria have not yet been developed for a specific sector or a specific environmental objective or
2. where the developed technical screening criteria are considered not directly applicable due to the innovative nature, complexity, and/or the location of the green projects, the issuer should be allowed to rely on the fundamentals of the Taxonomy to verify the alignment of their green projects with the Taxonomy.

This would mean that the verifier confirms that the green projects would nevertheless

- i. substantially contribute to one of the six environmental objectives as set out in the Taxonomy Regulation,
- ii. do no significant harm to any of these objectives, and
- iii. meet the minimum safeguards of the Taxonomy Regulation.

### Do you agree with this approach?

- Yes, both 1. and 2.
- Yes, but only for 1.
- Yes, but only for 2.
- No
- Don't know / no opinion / not relevant

### Question 7.1 Please specify the reasons for your answer to question 7:

*5000 character(s) maximum*

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

We think it is important to maintain this level of flexibility to enable market and technological innovations to take place without obstructing the overarching objective of achieving growth in the green bond market. As pointed out above, allowing for reliance on the overarching fundamentals of the Taxonomy where appropriate would reduce the risk of compliant green bonds at issuance becoming non-compliant by the time of full allocation. It would in our view however be important to ensure to the best extent possible a level playing field between green bond frameworks related to activities for which technical screening criteria will already be in place and those for which those criteria are still under development. For example the verification of the green bond framework could state explicitly that the framework is judged in compliance with the EU GBS on the basis of the information that is available at the time, but that the judgement has not been made on the basis of existing technical screening criteria.

**Question 7.2 Do you see any other reasons to deviate from the technical screening criteria when devising the conditions that Green Bond eligible projects or assets need to meet?**

- Yes
- No
- Don't know / no opinion / not relevant

**Question 8. As part of the alignment with the EU Taxonomy, issuers of EU Green Bonds would need to demonstrate that the investments funded by the bond meet the requirements on do-no-significant-harm (DNSH) and minimum safeguards. The TEG has provided guidance in both its Taxonomy Final Report and the EU GBS user guide on how issuers could show this alignment.**

**Do you foresee any problems in the practical application of the DNSH and minimum safeguards for the purpose of issuing EU Green bonds?**

- Yes
- No
- Don't know / no opinion / not relevant

**Question 8.1 Please specify the reasons for your answer to question 8:**

*5000 character(s) maximum*

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

**Question 9. Research and Development (R&D) plays a crucial role in the transition to a more sustainable economy, and the proposed EU GBS by the TEG explicitly includes such expenditure as eligible use of proceeds.**

**Do you think the EU GBS should provide further guidance on these types of activities, to either solve specific issues with green R&D or further boost investment in green R&D?**

- Yes, as there are specific issues related to R&D that should be clarified
- Yes, the proposed EU GBS by the TEG should be changed to boost R&D
- No, the proposed EU GBS by the TEG is sufficiently clear on this point
- Don't know / no opinion / not relevant

**Question 9.1 Please specify the reasons for your answer to question 9:**

*5000 character(s) maximum*

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

### **Questions on grandfathering and new investments**

**Question 10. Should specific changes be made to the TEG's proposed standard to ensure that green bonds lead to more new green investments?**

- Yes
- No
- Don't know / no opinion / not relevant

**Question 10.1 If you are in favour of changes, please explain what changes should be made**

*5000 character(s) maximum*

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

As pointed out in an earlier question, one way to encourage broader growth in green bond issuance, which would also help overcome supply shortages to meet investor demand is to enable general corporate purpose bond issuance under the umbrella of the EU Green Bond Standard - for example by requiring a minimum amount of turnover, CapEx or OpEx to be linked to taxonomy compliant activities. Doing so would make the EU Green Bond a much more versatile and attractive instrument and a genuine alternative to a conventional bond.

**Question 11. The EU Taxonomy technical screening criteria will be periodically reviewed. This may cause a change in the status of issued green bonds if the projects or assets that they finance are no longer eligible under the recalibrated taxonomy.**

**In your opinion, should an EU Green Bond maintain its status for the entire term to maturity regardless of newly adapted taxonomy criteria?**

- Yes, green at issuance should be green for the entire term to maturity of the bond
- No, but there should be some grandfathering
- No, there should be no grandfathering at all. If you no longer meet the updated criteria, the bond can no longer be considered green
- Don't know / no opinion / not relevant

**Question 11.1 Please specify the reasons for your answer to question 11:**

*5000 character(s) maximum*

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

To incentivise issuance of green bonds it needs to be ensured that EU Green Bond compliance verified at issuance remains in place until full allocation of the bond. Especially in the early stages of implementation of the taxonomy, with technical screening criteria evolving, it is important to allow for a level of certainty when linking green bond issuance in part to the taxonomy.

## Question on incentives

**Question 12. Stakeholders have noted that the issuance process for a green bond is often more costly than for a corresponding plain vanilla bond.**

**Which elements of issuing green bonds do you believe lead to extra costs, if any?**

--	--	--	--	--	--	--

	1 (no additional costs)	2 (low extra cost)	3 (extra cost)	4 (high extra cost)	5 (very high extra cost)	Don't No c app
Verification	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	
Reporting	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	
More internal planning and preparation	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	
Other	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	

**Question 12.1 Please specify the reasons for your answer to question 12, and if possible, provide the estimated percentage and monetary increase in costs from issuing using the EU GBS, or – ideally – the costs (or cost ranges) for issuing green bonds under the current market regimes and the estimated costs (or cost range) for issuing under the EU GBS:**

*5000 character(s) maximum*

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

**Question 13. In your view, how would the costs of an official standard as proposed by the TEG compare to existing market standards?**

- 1 - Substantially smaller
- 2 - Somehow smaller
- 3 - Approximately the same
- 4 - Somehow higher
- 5 - Substantially higher

**Question 13.1 Please specify the reasons for your answer to question 13:**

*5000 character(s) maximum*

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

Drawing up the green bond framework as well as ensuring both allocation and impact reporting to the required level of detail will inevitably result in costs for issuers. The requirement to verify at the very least the allocation report means that the green bond issuance becomes more time consuming and costly than conventional bond issuance. In this context it is a welcome step that the proposed GBS allows for incorporation of multiple projects into a green bond framework as well as for allocation and impact reporting to be done at portfolio level for multiple projects.

**Question 14. Do you believe that specific financial or alternative incentives are necessary to support the uptake of EU green bonds (green bonds following the EU GBS), and at which level should such incentives be applied ( issuer and / or investor ) ?**

**Please express your view on the potential impact:**

	<b>1</b> (very low impact)	<b>2</b> (rather low impact)	<b>3</b> (a certain impact)	<b>4</b> (rather high impact)	<b>5</b> (very high impact)	Don't know - No opinion - Not applicable
Public guarantee schemes provided at EU level, as e.g. InvestEU	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
Alleviations from prudential requirements	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Other financial incentives or alternative incentives for investors	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Other incentives or alternative incentives for issuers?	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>

**Question 14.1 Please specify the reasons for your answer to question 14, in particular if you indicated an important impact of “other incentives or alternative incentives”:**

*5000 character(s) maximum*

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

Financial incentives for issuers to offset some of the additional costs associated with green bond programmes compared to conventional bond issuance could encourage broader uptake of green bond issuance - in particular in the early stages. In the absence of incentives, issuers will more often than not rely on conventional bond issuance due to the flexibility and versatility it allows. Equally, with more information on the ESG position of corporates becoming available in the next few years as a result of new corporate disclosure requirements - either directly through the Taxonomy Regulation or the review of the NFRD - there will likely already be a reorientation of capital flows even for conventional corporate bond issuance. Allowing for general corporate purpose issuance under the EU Green Bond standard would help offset some of the inherent bias towards conventional bond issuance. At the same time, providing incentives to narrow the cost gap between conventional and green bond issuance could also encourage more issuers to enter the green bond market.

**Other questions related to the EU GBS**

The EU GBS as recommended by the TEG is intended to apply to any type of issuer: listed or non-listed, public or private, European or international.

**Question 15. Do you foresee any issues for public sector issuers in following the Standard as proposed by the TEG?**

- Yes
- No
- Don't know / no opinion / not relevant

**Question 15.1 Please explain your answer to question 15:**

*5000 character(s) maximum*

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

**Question 16. Do you consider that green bonds considerably increase the overall funding available to or improve the cost of financing for green projects or assets?**

- Yes
- No
- Don't know / no opinion / not relevant

**Question 16.1 Please explain your answer to question 16.**

**If possible, please provide estimates as to additional funds raised or current preferential funding conditions:**

*5000 character(s) maximum*

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

## **II. Questions on Social Bonds and COVID19**

---

During the ongoing COVID-19, financial markets have so far responded with significantly increased issuance of social bonds responding to the impact of COVID19. These social bonds often follow established market-based Social Bond Principles. The Commission is seeking the input of stakeholders on the lessons learned from this new development, including whether the Commission can play an even greater supportive role in building resilience to address future potential crises.

**Question 17. To what extent do you agree with the following statements?**

	1 (strongly disagree)	2 (rather disagree)	3 (neutral)	4 (rather agree)	5 (strongly agree)	Don't know - No opinion - Not applicable
Social bonds are an important instrument for financial markets to achieve social objectives.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
Social bonds targeting COVID19 are an important instrument for financial markets in particular to help fund public and private response to the socio-economic impacts of the pandemic.	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Social bonds targeting COVID19 are mostly a marketing tool with limited impact on funding public and private responses to the socio-economic impact of the pandemic.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
Social bonds in general are mostly a marketing tool with limited impact on social objectives.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
Social bonds in general require greater transparency and market integrity if the market is to grow.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>

**Question 18. The Commission is keen on supporting financial markets in meeting social investment needs.**

**Please select one option below and explain your choice:**

- The Commission should develop separate non-binding social bond guidance, drawing on the lessons from the ongoing COVID19, to ensure adequate transparency and integrity.
- The Commission should develop an official EU Social Bond Standard, targeting social objectives.
- The Commission should develop an official “Sustainability Bond Standard”, covering both environmental and social objectives.
- Other Commission action is needed.
- No Commission action is needed in terms of social bonds and COVID19.

**Question 18.1 Please explain your answer to question 18:**

*5000 character(s) maximum*

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

**Question 19. In your view, to what extent would financial incentives for issuing a social bond help increase the issuance of such bonds?**

- 1 - Very strong increase
- 2 - Rather strong increase
- 3 - Rather low increase
- 4 - Very low increase
- 5 - No increase at all

**Question 19.1 Please explain what kind of financial incentives would be needed:**

*5000 character(s) maximum*

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

## Additional information

---

Should you wish to provide additional information (e.g. a position paper, report) or raise specific points not covered by the questionnaire, you can upload your additional document(s) here:

The maximum file size is 1 MB.

You can upload several files.

Only files of the type pdf,txt,doc,docx,odt,rtf are allowed
